European Co-Operation in Science and Technology (COST) network on ALDosterone and MINeralocorticoid REceptor: COST-ADMIRE: 1st European Meeting

Under the Patronage of The University of Padua

University of Padua Aula Archivio Antico

Palazzo del Bò

October 16th -17th 2014

ADMIRE is an international network of expert clinicians and scientists from over 20 countries researching the role of aldosterone and mineralocorticoid receptors in the physiology and pathophysiology of cardiovascular and renal disease diagnosis and treatment.

- **Hot topics in aldosterone and mineralocorticoid receptor research**
 - **Key note lectures from leading researchers**
 - **Poster and oral presentations from early stage researchers**
- **Networking opportunities and discussions with leading European researchers in the field**

Conference Convener: Gian Paolo Rossi, University of Padua

*Conference Chairs: Gian Paolo Rossi, University of Padua; Frederic Jaisser, Paris Descartes;
and Brian Harvey, Royal College of Surgeons in Ireland.*

Thursday October 16th

- 09:00-13:00** Meeting of the ADMIRE COST Action Managing Committee
- 14:15-14:30** Welcome and Introduction: Gian Paolo Rossi, University Hospital Padua, Italy/
Frederic Jaisser, Cordeliers Research Centre, Paris, France
- 14:30-15:00** Paolo Bernardi-University of Padua, Italy
“From Mitochondrial Biochemistry to Mitochondrial Medicine”
- 15:00 -16:30** 18 x 5 min presentations by Senior Investigators
- 16:30-16:45** Coffee break
- 16:45 -19:00** Drinks Reception and Poster presentations by Early Stage Researchers

The Asclepio Ensemble strives to unite members of the University Hospital of Padua in the pursuit of musical excellence and cultural enrichment, to inspire and renew its audience and members. It was founded in 2013 by physicians interested in performing classic music and thereafter recruited medical students and doctors in training.

The Asclepio Ensemble now entails 25 musicians with a wide range of performing experiences, from serious amateurs to conservatory-trained professionals. All share a passionate quest of the expression of beauty and perfection through music. Musicians may turn to a career in medicine for a variety of reasons. As medical students, they often find that their passion for musical exploration seamlessly translates into the pursuit of medical knowledge. These students begin to think of their medical training as another form of art.

With this in mind, the Music and Medicine Initiative at University Hospital of Padua, spearheaded by Alois Saller, MD, PhD and supported by Dr. Claudio Dario, general director of the hospital allows these physicians to continue to enjoy their musical life. The program emphasizes continued academic excellence with the added opportunity to practice music as a balance to a busy academic life.

Concert Program in Aula Magna October 17th 2014
